Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 25, 2005 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is unclear as to whether or not "a remote device" of line 9 is the same as "a remote conventional audio device" of line 2 or "one or more remote devices" of line 6.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2643

5. Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Reinold et al. (US 6,185,305 B1, hereinafter "Reinold").

Regarding claim 1, Reinold discloses a system (Figure 1) for enabling digital audio data files (digital audio bitstream; col. 1, lines 61-62) to be played on a remote conventional audio device (analog wireless device 110 can be a radio; col. 2, lines 13-15), the system comprising:

a host PC configured to be connected to the Internet (col. 3, lines 31-44);

one or more electronic devices (audio circuit 120 includes an audio input interface 122 which receives digital audio signals, an audio decoding unit 124 which decodes the audio bitstream, and an audio digital to analog converter 126 which converts the audio bitstream to an analog audio signal; col. 3, line 31 – col. 4, line 30; and an analog transmitter 150 which transmits the audio signal to a conventional radio 110 via radio frequency; col. 5, line 58 – col. 6, line 1); and

a remote device (remote control device controls the analog transmitter; col. 3, lines 3-19).

Regarding claims 2-7, audio circuit 120 transmits audio signals (received at audio input interface 122) to a conventional radio in a radio frequency in the AM or FM band (col. 5, line 58 – col. 6, line 1) or wireless speakers or cordless telephone (col. 2, lines 13-16).

Response to Arguments

6. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground of rejection.
